

## Overview

In honor of Breast Cancer Awareness, Island Dental Associates is selecting a breast cancer survivor for a complimentary smile makeover this October! We have partnered with Stepping Stone Support, a local, all-volunteer nonprofit organization helping families affected by cancer since 2005. Stepping Stone Support has nominated an individual in need of a smile makeover, and Island Dental Associates' team is eager to help!

Being a part of the Long Island Community for over 26 years, Island Dental Associates is focused on delivering optimal patient care. "We understand that dental health can be indirectly affected due to breast cancer treatment. Individuals who undergo chemotherapy and radiation to combat breast cancer, often suffer from tooth decay, infections, and more. We also understand that treatment is costly and can place financial burden on these individuals and their families. We want our community to know that we are here to help them, support them, and that our office stands behind the fight to find a cure," Eric Weinstein, DDS, Owner of Island Dental Associates.

## Goals

1. **Give a Special Survivor Their Smile Back:** Giving someone back their smile back will also give them their life back! Beyond smiling, functionality returns, allowing patients to eat, speak and live comfortably everyday.
2. **Increase Breast Cancer Awareness:** 1 out of every 8 women in the United States is affected by breast cancer over the course of their lifetime. We want to rally behind the fight for a cure, and raise awareness throughout our community.
3. **Deliver Extraordinary Patient Care:** We are not your average office and we treat all of our patients with the highest standard of care. Our team of professionals, specialists and lab technicians have the knowledge and experience to deliver customized dental care to breast cancer survivors.
